

The specimen represented in our Plate, was communicated by JOHN TREVELYAN, Esq. of *Wallington, Northumberland*; but specimens, of a much finer colour, grown on espaliers, have been produced by THOMAS REYNOLDS, Esq. of *Wallington, Surrey*: and others, surpassing even these in beauty, from a wall in the garden of DANIEL BEALE, Esq. at *Edmonton*. It may be observed, however, that the Apples so matured have not so fine a flavour, nor can they be preserved so late as those from standard trees.
